Doğru / Yanlış:	D: ..... Y: ..... Net: .....

1. After years of analysing spectral data from distant star clusters, the leading astrophysicist confirmed that ___ had detected atmospheric water vapour on an exoplanet.

A) her **B)** them
C) hers **D)** herself
E) she

2. When the archaeologists unearthed the fragile cuneiform clay tablets, they transported ___ in climate-controlled containers to prevent fragmentation.

A) them **B)** they
C) theirs **D)** their
E) it

3. The architectural committee held an emergency meeting to resolve the structural dispute that had arisen between the chief engineer and ___.

A) he **B)** himself
C) his **D)** him
E) they

4. ___ was Rosalind Franklin whose groundbreaking X-ray diffraction images provided the critical evidence for uncovering the double-helix structure of DNA.

A) She **B)** There
C) It **D)** That
E) This

5. In light of recurring cyber threats, the hospital board considered ___ essential to upgrade all firewall protocols before connecting medical devices to the network.

A) that **B)** this
C) such **D)** them
E) it

6. The multinational pharmaceutical corporation decided to expand ___ clinical research facilities into developing markets across Southeast Asia.

A) it's **B)** its
C) their **D)** theirs
E) itself

7. While our research laboratory published its preliminary findings last month, the competing team has not yet finalized ___.

A) theirs **B)** their
C) them **D)** themselves
E) its

8. During the municipal assembly, the urban planners presented ___ sustainable transport recommendations to local authority representatives.

A) theirs **B)** themselves
C) them **D)** they
E) their

9. Dr. Elizabeth Finch invited an esteemed colleague of ___ from Oxford University to deliver the keynote address at the genetics symposium.

A) her **B)** herself
C) she **D)** hers
E) them

10. Their climate simulation predicted severe droughts across the basin, whereas ___ indicated substantial rainfall during the same period.

A) our **B)** we
C) us **D)** ours
E) ourselves

11. During the high-stakes international competition, the young pianist found ___ completely immersed in the emotional nuances of the Rachmaninoff concerto.

A) her **B)** she
C) herself **D)** hers
E) them

12. The Nobel laureate ___ attended the preliminary symposium session to answer questions directly from aspiring post-doctoral candidates.

A) himself **B)** him
C) he **D)** his
E) himselfs

13. Because deep-space radiation interferes with signal transmission, the autonomous planetary rover cannot traverse treacherous lunar craters by ___.

A) itself **B)** its
C) it **D)** it's
E) themselves

14. The newly accredited research institute prides ___ on maintaining uncompromising ethical standards throughout all clinical pharmaceutical trials.

A) it **B)** it's
C) its **D)** itself
E) themselves

15. During unexpected sub-zero blizzards, the polar explorers built makeshift snow shelters to protect ___ from severe frostbite and hypothermia.

A) them **B)** themselves
C) their **D)** theirs
E) each other

16. Although the two rival chess grandmasters respected ___ deeply, neither was willing to offer a draw during the marathon final match.

A) themselves **B)** theirs
C) one another **D)** their
E) each other

17. Throughout the grueling negotiations, the delegates representing numerous member states shared confidential intelligence briefings with ___.

A) theirs **B)** each other
C) themselves **D)** one another
E) their

18. During the peer review workshop, the two co-authors meticulously examined and critiqued ___ draft manuscripts before final submission.

A) themselves' **B)** each other
C) each other's **D)** theirs
E) one another

19. Rather than withholding proprietary research, the two competing biotech laboratories agreed to share experimental results openly with ___.

A) themselves **B)** one
C) their **D)** theirs
E) each other

20. The total carbon footprint of solar thermal power plants is significantly lower than ___ of traditional coal-fired generating facilities.

A) this **B)** those
C) that **D)** these
E) it

21. The tonal and vibrational characteristics of antique Italian violins differ substantially from ___ of modern factory-assembled instruments.
A) that **B)** this
C) those **D)** these
E) them

22. Global sea surface temperatures reached an unprecedented high last summer, and ___ has prompted marine biologists to issue urgent warnings about coral bleaching.
A) this **B)** these
C) those **D)** such
E) what

23. The prestigious research council awards overseas doctoral fellowships exclusively to ___ who have published high-impact papers in peer-reviewed journals.
A) that **B)** those
C) this **D)** these
E) them

24. While these immediate policy interventions may curb inflation in the short term, ___ planned for the next decade will determine long-term fiscal stability.
A) that **B)** those
C) this **D)** such
E) oneself

25. During deep-sea exploration, the remote sensor registered ___ unusual moving along the seabed, prompting the submersibles to investigate further.
A) anything **B)** nothing
C) something **D)** everything
E) anyone

26. Forensic investigators thoroughly inspected the damaged electrical circuits, but they could not discover ___ that pointed to deliberate sabotage.
A) something **B)** nothing
C) someone **D)** everything
E) anything

27. ___ in the international archaeological delegation agrees that preserving the fragile ruins takes precedence over opening the site to mass tourism.
A) Everyone **B)** All
C) Both **D)** Many
E) Few

28. Although several independent historians suspected fraud in the ancient chronicle, ___ has managed to prove the document is a modern forgery.
A) anybody **B)** nobody
C) everybody **D)** somebody
E) whoever

29. Astronomers processing deep-space infrared signals observed ___ unprecedented: a dying star engulfing an entire rocky planet in its orbit.
A) anything **B)** everything
C) nothing **D)** something
E) somewhere

30. If ___ wishes to inspect the confidential archival files, they must obtain written authorization from the ministry director.
A) all **B)** no one
C) everyone **D)** anyone
E) few

31. Before finalizing the geopolitical assessment, the foreign policy analysts decided to evaluate the territorial crisis from ___ analytical perspective.
A) other **B)** the other
C) others **D)** the others
E) another

32. Due to unexpected permafrost thawing, the drilling crew requested ___ three weeks to reinforce the unstable foundation pillars.
A) other **B)** others
C) another **D)** the others
E) every

33. Rising oceanic temperatures threaten not only coral colonies but also ___ marine organisms that depend on stable thermal environments.
A) other **B)** another
C) others **D)** the others
E) each other

34. Some climate scientists emphasize immediate carbon capture technologies, whereas ___ argue that radical emission cuts must remain the primary objective.
A) other **B)** another
C) others **D)** the other
E) each other

35. Engineers deployed two deep-sea submersibles to explore the trench; one monitored hydrothermal vents, while ___ mapped benthic sediments.
A) the other **B)** another
C) others **D)** other
E) the others

36. Of the five satellites launched during the atmospheric mission, two reached their intended orbit, but ___ fell back into the upper atmosphere.
A) the other **B)** another
C) others **D)** the others
E) other

37. When evaluating controversial historical testimonies, one must conscientiously acknowledge ___ own cultural biases to maintain objectivity.
A) his **B)** one's
C) her **D)** their
E) ones

38. Structural engineers are replacing vulnerable timber foundations with highly durable, weather-resistant ___ in newly constructed coastal zones.
A) one **B)** ones
C) them **D)** that
E) those

39. During the post-match tactical debrief, the chess players blamed ___ rather than external conditions for their unexpected errors in the final round.
A) them **B)** herself
C) their **D)** each other
E) themselves

40. Whenever a patient experiences unexpected adverse side effects from the experimental drug, ___ should report the symptoms immediately to the clinical supervisor.
A) he or she **B)** they
C) it **D)** them
E) theirs
